SUMMARY

I am a Full Stack Web Developer that enjoys creating web features and products with Vuejs, Bootstrap, React/Redux, Nestjs, Express and Ruby on Rails. I recently graduated from [Microverse](#), an online development bootcamp, where I developed strong coding and interpersonal skills, and now I am seeking to apply these skills to a company to enhance my career growth as a Developer.

Front-End: JavaScript, React, Typescript, Vue, HTML5, Bootstrap

Back-End: Ruby on Rails, Nestjs, Express

Database: PostgreSQL, MongoDB

Tools & Methods: Git, GitHub, Heroku, Mobile/Responsive Development, TDD, Chrome Dev Tools

Professional: Remote Pair-Programming, Teamwork, Mentoring

EXPERIENCE

MY HIGHLIGHTED PERSONAL PROJECTS

Full Stack Web Developer

Remote
September, 2021– Present

[Movie Land](#) — This is a Demo app I built to fetch a restful API from OMDB to filter the list of movies.

- Built with: Reactjs, CSS, OMDB API key

[Task Tracker App](#) — App that keeps track of your event in a day or a month and customizes them to help you achieve your tasks in a timely manner.

Built with: React, Bootstrap and JSON-server

[Digital Calculator](#) — Simple calculator app built with React.

- Built with: HTML, Bootstrap, Webpack, CSS and React

[Pockect Smith](#) — Mobile web application where you can manage your budget and see a list of transactions. Users can see how much money they have spent and on what item they spent their money on.

- Built with: Ruby on Rails, PostgreSQL and Bootstrap

[My Catalogs](#) — We created a console app that helps you keep a record of different types of things you won: books, music albums, movies, and games.

- Built with: Ruby

[Bcycom](#) — Motorcycle store app where users can reserve their most favorite motorcycle.

- Built with: Ruby on Rails, React, Postgres, JWT

ANALIFY

Backend Developer

Lagos, Nigeria
October, 2022– Present

- Managing Admins data in a database.
- Connecting API to a payment system to secure users financial data.
- Consuming Backend API to integrate with the Frontend to become more user friendly and interactive.
- Authorizing our users and storing their data properly so there won't be any barrier between Analify and their customers.

FREELANCE

Frontend Developer

Remote
October, 2021– Present

- Connecting to RESTFUL APIs to map through JSON data and view them on the web.
- Connecting Backend with Frontend and managing data in the database
- Handling success and error messages to notify users.

EDUCATION

MICROVERSE

October, 2021 – October, 2022

Remote Full Stack Web Development Program, Full Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with JavaScript, Ruby on Rails, React, HTML and CSS.
- Developed skills in remote pair-programming using GitHub, industry-standard gitflow, and daily standups to communicate and collaborate with international remote developers.
